

Surya Sekhar Prajapati

Full Stack Developer

+91-79802-80372 | surya2004sekhar@gmail.com | linkedin.com/in/surya-sekhar-prajapati | suryasekhar.vercel.app | github.com/Suryachamp

Professional Summary

Full Stack Developer with production frontend experience and hands-on backend development across personal full-stack projects. Builds end-to-end applications using React component architecture, HTML/CSS templates, and Node.js, with REST API design, JWT authentication, Prisma ORM, and database integration across MongoDB and PostgreSQL. Proficient with AI-augmented development tools (Cursor, Lovable, Gemini API) to accelerate delivery. Experienced building reusable React templates and pixel-perfect HTML interfaces from Figma designs, diagnosing Core Web Vitals issues, and implementing server-side rendering on a live e-commerce platform.

Experience

Ubuy Technologies Pvt. Ltd.

Sep 2025 – Present

Frontend Software Engineer

Jaipur, India

- Engineered 30+ responsive web pages and 15+ modular React/Next.js components with server-side rendering, dynamic routing, and reusable architecture across HTML, SCSS, and Bootstrap codebases for a live international e-commerce platform.
- Diagnosed and resolved Google PageSpeed Insights failures – including render-blocking resources, unoptimized images, and Cumulative Layout Shift (CLS) – improving Core Web Vitals scores on production storefronts.
- Containerized local development environments with Docker and standardized Git branching workflows across a multi-developer team, eliminating local-to-production environment drift.

Projects

Subscription Manager | Node.js, Express, PostgreSQL, Prisma ORM, JWT, Zod | GitHub

Jun 2026 – Present

- Designing and building a production-ready subscription tracking REST API using Node.js, Express, and PostgreSQL with Prisma ORM for type-safe schema migrations and relational data modeling.
- Implemented layered Express architecture (controllers, services, middleware, utils) with Zod schema validation, bcrypt password hashing, and JWT authentication stored in HTTP-only cookies.
- Built a complete auth flow (register, login, logout, session verification) and subscription CRUD endpoints with parameterized routing and user-scoped data access control.

CareerForge – AI Career & Resume Suite | MERN Stack, JWT, Google Gemini API, Docker | Live Demo

May – Jun 2026

- Built a full-stack AI career platform with a React/Vite frontend and Node.js/Express/MongoDB backend, featuring JWT-based authentication with HTTP-only cookies to mitigate CSRF/XSS.
- Engineered an AI-guided resume editor with a real-time compiler pipeline, parsing and rendering resume source into a live formatted preview using PDF Parse and Multer for file handling.
- Designed AI prompt pipelines for job-description parsing, skill-gap analysis, and tailored interview question generation, producing structured readiness reports with computed match scores.
- Containerized the full stack with Docker Compose for single-command deployment across frontend, backend, and database services.

Budget Box | Next.js, Node.js, PostgreSQL, IndexedDB | Live Demo

Nov – Dec 2025

- Architected an offline-first budgeting application using Next.js and IndexedDB, enabling full functionality with zero network dependency.
- Built a 6-module analytics dashboard covering forecasting, trend analysis, and automated anomaly detection across spending categories.
- Designed Node.js/PostgreSQL REST API endpoints for local-to-server sync, resolving conflicts across concurrent user sessions.

Nagrik And Samvidhan | React, JavaScript, Gemini API

Aug – Nov 2024

- Integrated the Google Gemini API to deliver real-time AI-assisted summarization of constitutional articles for a civic education platform.
- Designed gamified learning modules with interactive quizzes and structured content layouts to improve engagement and knowledge retention.
- Optimized React rendering and JS execution pipelines, resolving bottlenecks to improve application load performance.

Technical Skills

Languages: JavaScript, C++, HTML5, CSS3, SCSS

Backend: Node.js, Express.js, REST API Design & Integration, JWT Authentication, Prisma ORM

Databases: MongoDB, PostgreSQL, MySQL, SQL

Frontend: React, Next.js, Redux Toolkit, Bootstrap, Tailwind CSS, jQuery, Shadcn/UI

Performance: Core Web Vitals, PageSpeed Optimization, LCP, CLS, FID Debugging, Mobile-First Responsive Design

Build Tools: Vite, Webpack (config-level exposure)

DevOps & Tools: Docker, Git, GitHub, Postman, Vercel, Netlify, Render

AI Development Tools: Cursor, Claude Code, Lovable, Google Gemini API

Design & Productivity: Figma, Canva, MS Word, WordPress

Additional Skills: PHP, GenAI Tools (Cursor, Lovable)

Fundamentals: Data Structures and Algorithms

Education

University of Engineering and Management

2022 – 2026

Bachelor of Technology in Computer Science – GPA: 8.32

Jaipur, India

Nava Nalanda School

2022

WBCHSE – Percentage: 86%

Kolkata, India

Certifications

React Basics – Coursera (2024) | JavaScript Fundamentals – Coursera (2024) | Problem Solving Through Programming in C – NPTEL (2023)

DevOps Prerequisite – Coursera (2026)
