PROFESSIONAL SUMMARY

Full Stack Developer experienced across React/Next.js, Node.js/Express, and Laravel/PHP, building production frontends and end-to-end applications with REST API design, JWT authentication, and PostgreSQL/MySQL/MongoDB integration. Skilled in database-driven business logic, Docker containerization, and Core Web Vitals optimization on live platforms.

EXPERIENCE

Ubuy Technologies Pvt. Ltd.

Frontend Software Engineer — Jaipur, India | Sep 2025 – Present

- Engineered 30+ responsive pages and 15+ React/Next.js components with SSR for a live e-commerce platform.
- Resolved PageSpeed failures — render-blocking resources, unoptimized images, CLS — improving Core Web Vitals.
- Containerized local dev environments with Docker and standardized Git workflows across the team.

PROJECTS

LoanBridge – Full Stack Loan Assessment Platform

Laravel, PHP, MySQL, REST API, Business Rule Engine, Docker | Live Demo | Aug 2026 – Present

- Built a Laravel (MVC) loan assessment app with a database-driven Business Rule Engine for eligibility checks.
- Integrated a Credit Bureau API using CRC32 hashing for consistent, repeatable credit scoring per applicant.
- Containerized MySQL with Docker Compose and shipped a Postman collection for one-command setup and testing.

Subscription Manager

Node.js, Express, PostgreSQL, Prisma ORM, JWT, Zod | GitHub | Jun 2026 – Present

- Building a subscription tracking REST API with Node.js, Express, and PostgreSQL using Prisma ORM.
- Layered the Express architecture with Zod validation, bcrypt hashing, and JWT auth in HTTP-only cookies.
- Built a full auth flow and subscription CRUD endpoints with user-scoped data access control.

CareerForge – AI Career & Resume Suite

MERN Stack, JWT, Google Gemini API, Docker | Live Demo | May – Jun 2026

- Built a full-stack AI career platform with React/Vite and a Node.js/Express/MongoDB backend, secured with JWT.
- Engineered an AI-guided resume editor with a real-time compiler pipeline using PDF Parse and Multer.
- Designed AI prompt pipelines for skill-gap analysis and interview prep with computed match scores.

Budget Box

Next.js, Node.js, PostgreSQL, IndexedDB | Live Demo | Nov – Dec 2025

- Architected an offline-first budgeting app using Next.js and IndexedDB with zero network dependency.
- Built a 6-module analytics dashboard for forecasting, trend analysis, and anomaly detection.
- Designed Node.js/PostgreSQL REST endpoints for local-to-server sync across concurrent sessions.

TECHNICAL SKILLS

Languages: JavaScript, PHP, C++, HTML5, CSS3, SCSS, SQL

Frameworks: React, Next.js, Node.js, Express.js, Laravel, Redux Toolkit, Tailwind CSS, Bootstrap

Backend & APIs: REST API Design, JWT Authentication, Prisma ORM, Business Rule Engine Design, MVC Architecture

Databases: PostgreSQL, MySQL, MongoDB

DevOps & Tools: Docker, Git, GitHub, Postman, Vercel, Railway, Figma

AI Tools: Cursor, Claude Code, Lovable, Google Gemini API

EDUCATION

University of Engineering and Management

Bachelor of Technology in Computer Science – GPA: 8.32 — Jaipur, India | 2022 – 2026

Nava Nalanda School

WBCHSE – Percentage: 86% — Kolkata, India | 2022

CERTIFICATIONS

React Basics – Coursera (2024) | JavaScript Fundamentals – Coursera (2024) | Problem Solving Through Programming in C – NPTEL (2023) | DevOps Prerequisite – Coursera (2026)
