PROFESSIONAL SUMMARY

Detail-oriented Computer Science student with experience developing responsive web applications, offline-first systems, student management platforms, and AI-assisted learning tools. Skilled in building scalable front-end interfaces, integrating RESTful APIs, creating analytics dashboards, and delivering production-quality features. Strong foundation in JavaScript, React, Next.js, and modern front-end development practices.

EDUCATION

University of Engineering and Management	Jaipur, India
<i>Bachelor of Technology in Computer Science - GPA: 8.12/10</i>	2022 – 2026

Nava Nalanda School	Kolkata, India
<i>WBCHSE - Percentage: 86%</i>	2022

Andhra Association Higher School	Kolkata, India
<i>WBBSE - Percentage: 76%</i>	2020

TECHNICAL SKILLS

- **Development Frameworks:** React, Next.js, Bootstrap, TailwindCSS, jQuery, SCSS
- **Programming & Problem Solving:** JavaScript, C++, Data Structures & Algorithms
- **Database Technologies:** SQL, MongoDB, PHP
- **Tools & Platforms:** GitHub, Netlify, Vercel, FTP, Render, MS-Excel
- **Design & Productivity:** Figma, Canva, MS Word, WordPress
- **Additional Skills:** REST API Integration, Responsive Web Design, GenAI Tools (Cursor, Lovable)

EXPERIENCE

Ubuy Technologies Pvt. Ltd.	Jaipur, India
<i>Front End Developer Intern</i>	Sept 2025 – Dec 2025

- Built 30+ clean, responsive web pages via HTML, SCSS, and Bootstrap to maintain high cross-device consistency.
- Programmed 15+ modular components in Next.js to streamline client routing logic and server-side rendering execution.
- Optimized mobile-first responsive layouts, directly boosting user interface accessibility and device speeds by 25%.

PROJECTS

Budget Box	Nov 2025 - Dec 2025
-------------------	---------------------

- Architected an offline-first budgeting web app with Next.js and IndexedDB to increase runtime reliability by 100%.
- Engineered a dynamic analytics dashboard providing 5+ financial insights including forecasting and automated anomaly alerts.
- Created secure Node.js + PostgreSQL database synchronization APIs, reducing local-server data conflicts by 90%.

Quorium Student Management System	Aug 2025
--	----------

- Developed a fully responsive student management interface utilizing structural React, TailwindCSS, and Shadcn/UI.
- Integrated clean data pathways with the DummyJSON API to execute scalable client-side form routing rules efficiently.
- Implemented optimized client search features to process a modular metric dashboard showcasing 100+ user records.

Nagrik And Samvidhan	Aug 2024 - Nov 2024
-----------------------------	---------------------

- Deployment-configured an AI-assisted legal learning application with the Gemini API for rapid, accurate article summaries.
- Formulated 3+ gamified modules including interactive digital quizzes and layout structures to maximize user metrics.
- Accelerated core ReactJS and JavaScript file systems to minimize layout rendering latency and ease future expansion.
